

**A**  
AXALTA **Irus Scan**

**SCAN SMARTER**

# THE ULTIMATE IN COLOUR MEASUREMENT TECHNOLOGY

**MEASURES COLOURED SPARKLE:** Accurately detects and matches colours with metallic and pearlescent flakes.

**MEASURES HUE SHIFTING EFFECT PIGMENTS:** Precisely captures hues that shift at different observation angles.

**MEASURES GLOSS GRADES:** Analyses gloss levels for a complete colour match.

**LIVE VIEW SURFACE IMAGING:** Provides real-time surface visualisation for enhanced accuracy.

Boost your productivity, reduce waste, and achieve unmatched colour precision with Axalta IruScan.

# AXALTA Irus Scan

PERFORMANCE  
IMPROVEMENTS

## ACCURATE COLOUR EVERY TIME

From simple to the most complex colours, matches are made quickly and easily. That means faster repair times and higher levels of customer satisfaction.

TIME  
ADVANTAGES

## HIGHER PRODUCTIVITY

Getting an accurate colour match the first time, every time means faster workflow through the body shop which increases throughput and profitability.

LABOR  
OPTIMIZATION

## OPTIMISATION OF SKILLED LABOUR

Easy to use, it does not require skilled technicians to operate. This keeps them productive in the paint booth, reducing unnecessary bottlenecks in workflow.

ENVIRONMENTALLY  
THOUGHTFUL

## REDUCED WASTE

Accurate colour, sparkle, and effect readings reduce the need for sprayouts, decrease rework, and ultimately lower product waste.

## END-TO-END CLOUD BASED DIGITAL COLOUR MANAGEMENT PROCESS

A SIMPLE 3-STEP DIGITAL PROCESS

# SCAN

# MATCH

# MIX

Axalta Irus revolutionises colour matching by offering a precise process that maximises profitability and minimises environmental impact.

From scanning to mixing, Axalta Irus is fully digital, seamlessly connected, and highly accurate resulting in higher productivity for your bodyshops.
