

When you have a project that requires immediate attention

REPLASHADE™

Custom Color Match and Make Service

Axalta's custom color match service is designed to produce custom color matches in 8 days*; providing the turnaround needed to get the job done in a timely manner.

Axalta's dedicated team of Color Specialists have the ability to match color needs efficiently utilizing a spectrophotometer; a color-calibrated device that repeatedly and accurately captures images of multicolor materials by measuring the amount of light (of a specified wavelength) which passes through a medium. In addition, a visual inspection based on the customer's lighting specs is performed on every color match project to provide comparable color.

Product Available Types:

- Polyesters
 - TGIC Polyester Standard (20+ gloss)
 - Glycouril Polyester
- Premium Weathering (70+ gloss)

Surface Finishes*:

- Smooth (non-metallic)
Smoothness rating no higher than PCI-7
- Mini-Tex
- Wrinkles (polyesters only)
- Gloss ranges are +/- 10 units

* Special properties or non-smooth surfaces (except wrinkles and mini-tex) are not candidates.

Volumes:

- ReplaShade™ is produced in packaging of 55 lb increments with a minimum order of 55 lbs, and a maximum of 385 lbs. Products will ship +/- 10% of all orders.

Due to our 99% accuracy rate in color matches we will also be moving to a match and make process which allows for quicker production times.

Contact a ReplaShade™ representative for more information or product submission, 1-800-667-9610 or e-mail replashade.powder@axaltacs.com
